WORK EXPERIENCE

AI Research Intern

3/2025 - 6/2025

- My responsibility: Read and summarize research papers on AI for finance, focusing on Transformer and Time2Vec models.
- Technologies: Transformer, Time2Vec [\[Report\]](#) [\[github\]](#)

PROJECTS

Text Multi-Label Classification with Deep Learning [GROUP] [\(Link\)](#)

10/2024 - 12/2024

- Preprocessed dataset and implemented BERT models
- Evaluated and compared PhoBERT and CodeBERT models for multi-label text classification, achieving 82% accuracy
- Technologies: LSTM, BiLSTM+CNN and BERT

Pen and Pencil Detection with YOLOv8 [Individual] [\(Link\)](#)

- Prepared and annotated a custom dataset, leveraging Roboflow API for efficient data management and augmentation to streamline the data pipeline.
- Implemented an end-to-end object detection solution, achieving 0.935 mAP50 and 0.857 mAP50-95
- Technologies: YolloV8, Python

Chatbox Q&A System with RAG [GROUP] [\(Link\)](#)

6/5/2025-25/5/2025

- Collected data from my university's website, cleaned, and chunked data for knowledge base, improving response accuracy
- Technologies: Sentence-Transformer (multilingual-e5-large-instruct), LLaMA 3, Python.

EDUCATION

University

University of Engineering and Technology – Vietnam National University, Hanoi (VNU-UET)
Bachelor in Artificial intelligence 2022 - 2026

- CPA: 2.91/4.00

High School

Informatics major, Thai Nguyen High School for the Gifted.

HONORS AND AWARDS

- Third Prize, Provincial Informatics Competition (C++) 2020
- Demonstrated strong problem-solving skills in competitive programming

SKILLS

Programming Languages: Python, C++

Tools and Frameworks: PyTorch, Git, Docker, git, SQL, jupyter, tensorflow, keras.

Soft Skills: Problem-solving, Teamwork, Time Management

Sports: Football, Volleyball, Running, Badminton.
